PROJECTS

Bug Hunter – Online Detective: Cyber Mystery Investigation Game **Sept | 2025**

• Built a gamified cybersecurity learning platform (academic project, B.Sc. Computer Science, Sem V) enabling users to solve phishing, XSS, SQL injection, malware, and digital forensics challenges through realistic cyber-detective scenarios. Implemented key features including secure authentication, AIpowered hints, andreal-time scoring to track user progress and performance.
• Designed system architecture using UML diagrams; built an admin dashboard and real-time data sync using Firebase, following Agile development methodology.

My Vehicle Log – Vehicle Maintenance & Safety Management App **Mar | 2026**

• Built a full-stack vehicle management platform (academic project, B.Sc. Computer Science, Sem VI) enabling users to centralize maintenance, documents, fuel expenses, and service history through realistic ownership workflows.
• Built a full-stack vehicle management platform (academic project, B.Sc. Computer Science, Sem VI) enabling users to centralize maintenance, documents, fuel expenses, and service history through realistic ownership workflows.
• Designed system architecture using UML diagrams; built secure authentication, real-time data sync, and cloud storage for documents/images using Firebase.

ADDITIONAL DETAILS

• Core Member, Swachha Vasundhara Abhiyaan (April 2025 – Present), organizing weekly mangrove and beach cleanup drives.
• Completed Cyber Security & Ethical Hacking certification from Edureka (February 2025) and attended an Ethical Hacking Workshop.
• Organized Blood Donation Camps as an NSS Leader for two consecutive years, coordinating volunteers and event logistics.
• Planned and executed a Mega Beach Clean-up Drive on International Coastal Cleanup Day with Swachha Vasundhara Abhiyaan, Bandra, Mumbai.
• Participated in a Tree Plantation Drive organized by Mission Green Mumbai, developing leadership, teamwork, communication, and event management skills.
